

KMLObject

```
graph BT; KMLObject --> Feature; Feature --> Container; Container --> Folder;
```

The diagram illustrates a class hierarchy for KML objects. It consists of four rectangular boxes arranged vertically, each containing a text label. The boxes are connected by upward-pointing arrows, indicating that the classes below inherit from the class above. The hierarchy starts with 'Folder' at the bottom, followed by 'Container', then 'Feature', and finally 'KMLObject' at the top.
